

Modular Vault Systems

“ For the past ten years I have recommended International Vault. They work with my clients to meet their needs and expectations. International Vault consistently delivers a great product, on time, at a great price – and they always stand behind any vault they manufacture and sell.”

~ Andre' B. Ya Deau, Ph.D.
International Security Services, Inc

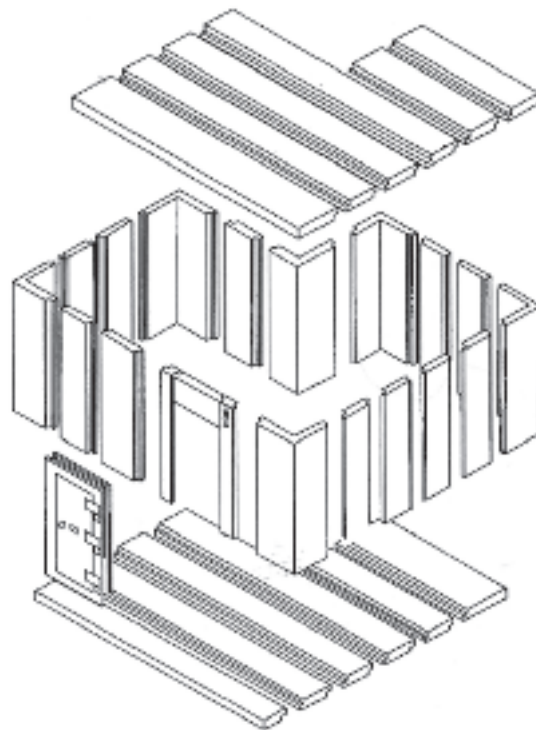

Since 1982 - Oldest U.S.
manufacturer of U.L.
listed Modular Vault
Products.

Complete Line of U.L. Class M, 1, 2, 3 & GSA Modular Vault Systems and Components

- Custom sizes and shapes
- Slab-on-grade and high-rise applications
- Can expand or relocate as your business grows

U.L. Listed Modular Vault Systems

General Information

State-of-the-Art Vault Design and Technology

From the company that created the modular vault industry, International Vault offers a complete line of vault systems designed for slab-on-grade and high-rise applications.

Using advanced design and engineering techniques, our U.L. Listed Class M, 1, 2, 3 MEGAcrete and Lightweight systems offer maximum security, custom designed to fit your specific size and shape requirements.

Based on our years of manufacturing experience, engineering resources, quality products and expert installations, the vault portion of your application is as easy as choosing International Vault, Inc.

International Vault offers Fire Resistant vault rooms, GSA vault systems and the newest technology - ISP Insulated Structural U.L. vault wall panels for building exteriors!

Contemporary Solutions to Traditional High Security Needs

Lightweight modular vault systems make high-rise, high security a reality. Systems are designed and manufactured based on specific field conditions.

MEGAcrete modular vault systems are designed for slab-on-grade applications, and offer a cost-effective alternative to traditional poured-in-place systems.

Thinner than "Poured-In-Place" vaults (saves precious branch space).

Installed in a fraction of the time of "Poured-In-Place" equivalent.

Factory quality assurance unlike the "Poured-In-Place" equivalent.

Features

Superior torch and tool attack resistance per U.L. #608 Standard for Safety.

Completely flexible – virtually no design restrictions. Modular vault systems expand as your business grows – relocate when your business moves.

The modular vault/vault door package offers a "shiplap" U.L. connection with no messy grout pocket.

Modular design may qualify for investment tax credit and accelerated depreciation.

Complete Project Management

From design and layout, through delivery and installation, International Vault's diversified staff of engineers, designers, project managers and field personnel provide expert consultation and guidance in all phases of a custom engineered modular vault application.
